BUT FIRST...

Slate

Management Decision Problem

What are consumer awareness and expectations regarding latte drinks?

(Ready to drink and at a cafe , etc)

Research Problems

1

Investigate what people consider a latte.

2

Determine whether people prefer ready to drink or going to a coffee shop.

3

Determine whether energy or taste is more important when it comes to caffeinated beverages

Methods

SAMPLING PLAN: RECRUITMENT SCHEDULE	Teammate 1: Jose Valdivia	Teammate 2: Yesha Prajapati	Teammate 3: Esmeralda Lozano	Teammate 4: Adriana Carrales	Teammate 5: Suman Rupal
Wave 1: 10/15/21 **Sample size:**	**Personal Contacts:** Coworkers (Text, 5) **Social Media Contacts:** Facebook Wall Post (25) **Organizations:** Body Building & Fitness Group (Facebook, 20)	**Personal Contacts:** Friends & Family (email/text, 5) **Social Media Contacts:** Instagram story (100) **Organizations:** QuanTam (13)	**Personal Contacts:** Friends (Text, 5) **Social Media Contacts:** Facebook (50) **Organizations:** Facebook Group - Coffee Lovers! (20)	**Personal Contacts:** Friends (Text , 6) **Organizations:** West Lawn Neighborhood Group (Facebook , 100)	**Personal Contacts:** Family & Friends (Text, 10) **Social Media Contacts:** Facebook (75) **Organizations:** Gym
Wave 2: 10/20/21 **Sample size:**	**Personal Contacts:** Friends (Text, 5) **Social Media Contacts:** Snapchat Story (25) **Organizations:** Addicted to Coffee (Facebook, 20)	**Personal Contacts:** Friends & Family (email/text, 5) **Social Media Contacts:** Snapchat story (150) **Organizations:** HerCampus (30)	**Personal Contacts:** Friends (Text, 5) **Social Media Contacts:** Snapchat Story (20)	**Personal Contacts:** Coworkers (Text , 6) **Social Media Contacts:** Snapchat (5)	**Personal Contacts:** Family & Friends (Text, 3) **Social Media Contacts:** Instagram(15) **Organizations:** Discord(20)

Participants

Starting Sample Size: 289

Removed From Data: 187

Final Sample Size: N= 102

187 of participants were removed because some questions weren’t answered and survey wasn’t completed.

SLIDESMANIA.COM

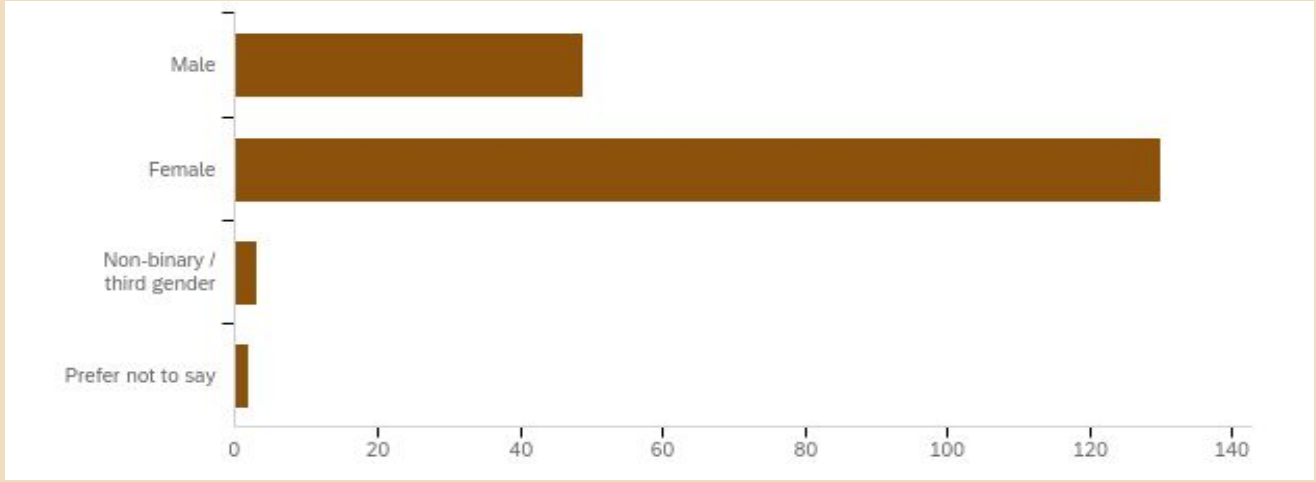

Sampling Population V.S Target Population

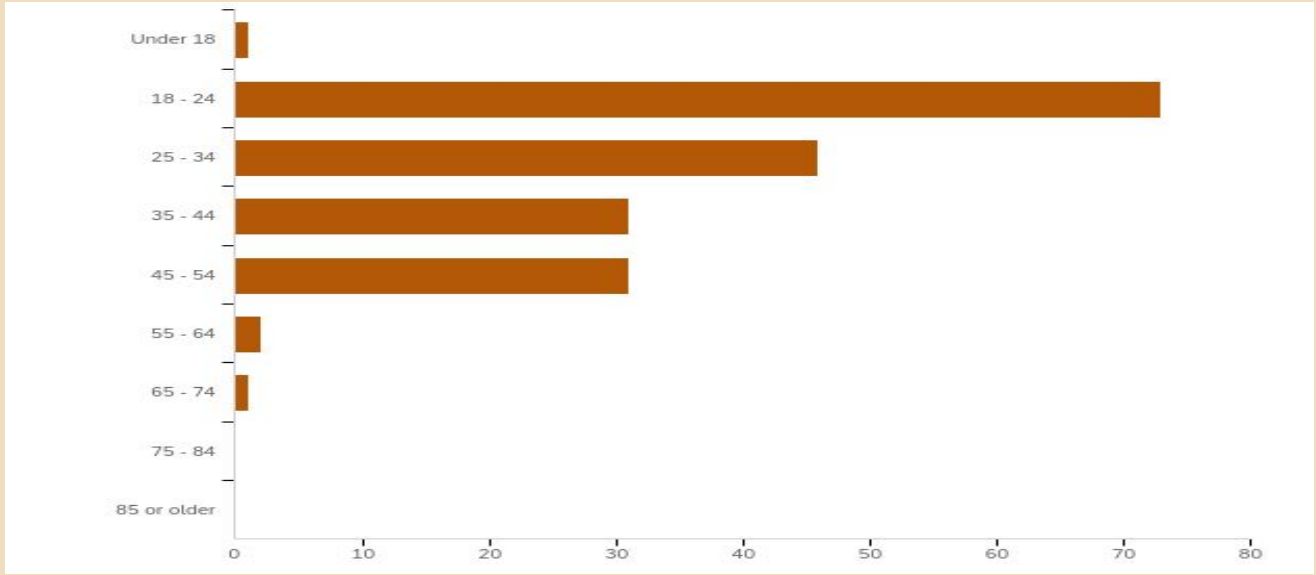

- 70% Female
- 30% Male
- 40% between the ages of 18-24
- 25% exercise at least 3 times a week

- Ages 18-30
- Relatively Active Individuals
- Coffee Lovers
- Chocolate Milk Lovers
- Those Who Are Lactose Intolerant

Participant's Age and Gender

- 70% of participants were female and 30% were male.
- 5 participants decided to answer other.
- 40% of participants are between the ages of 18-24.

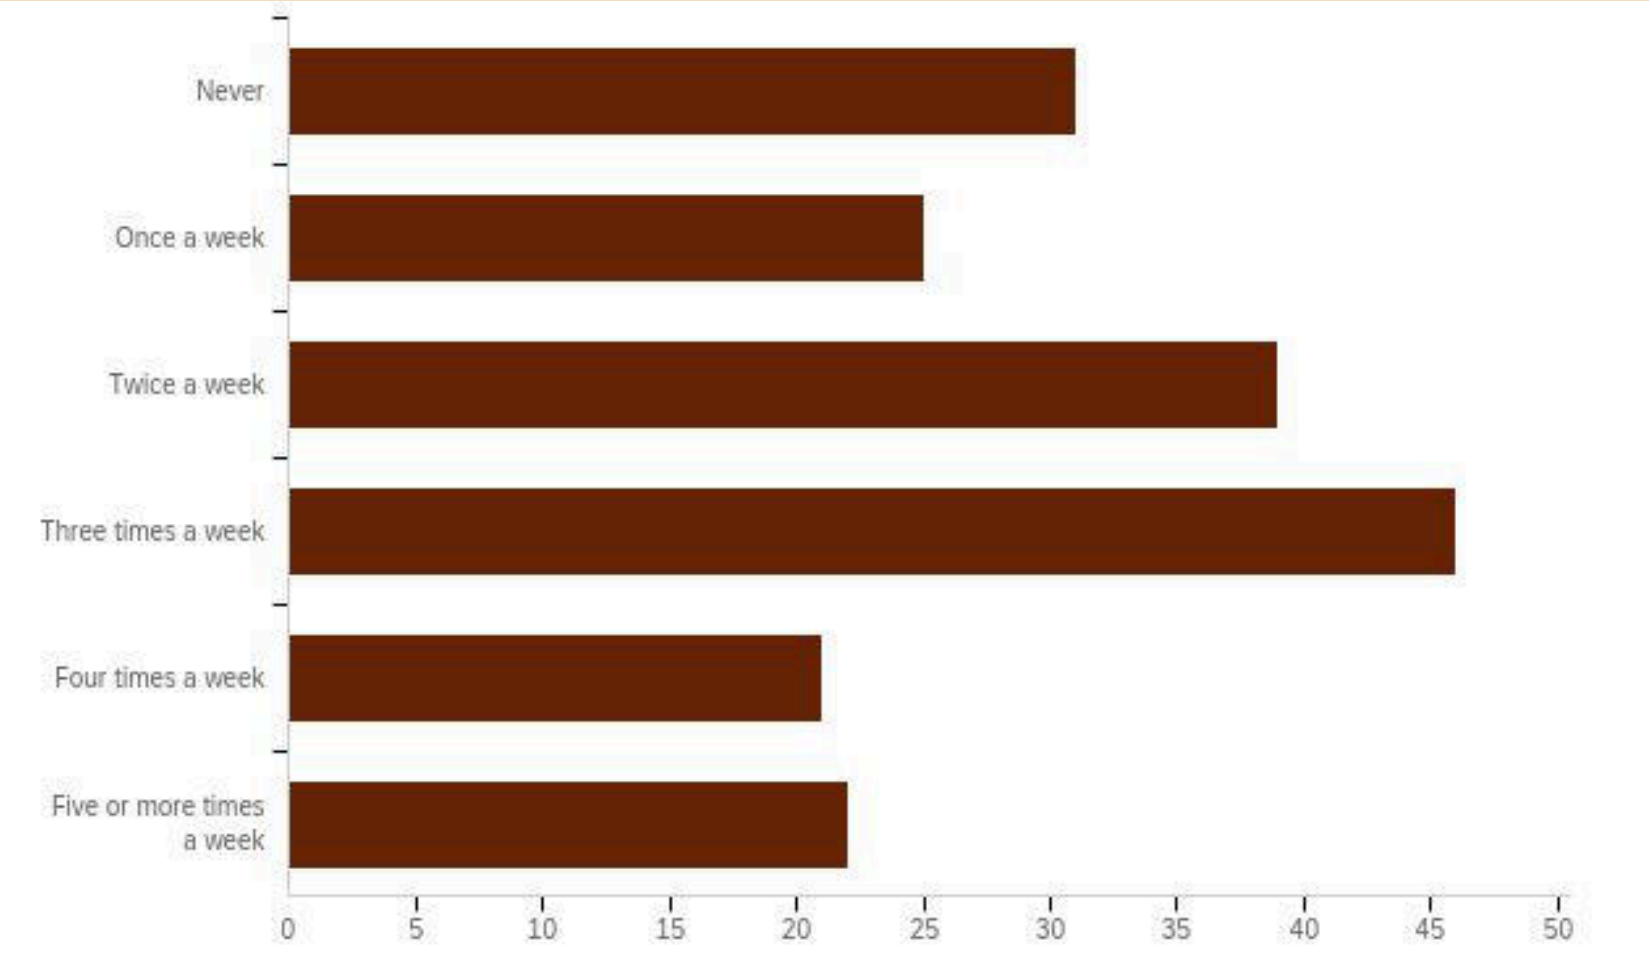

N= 102

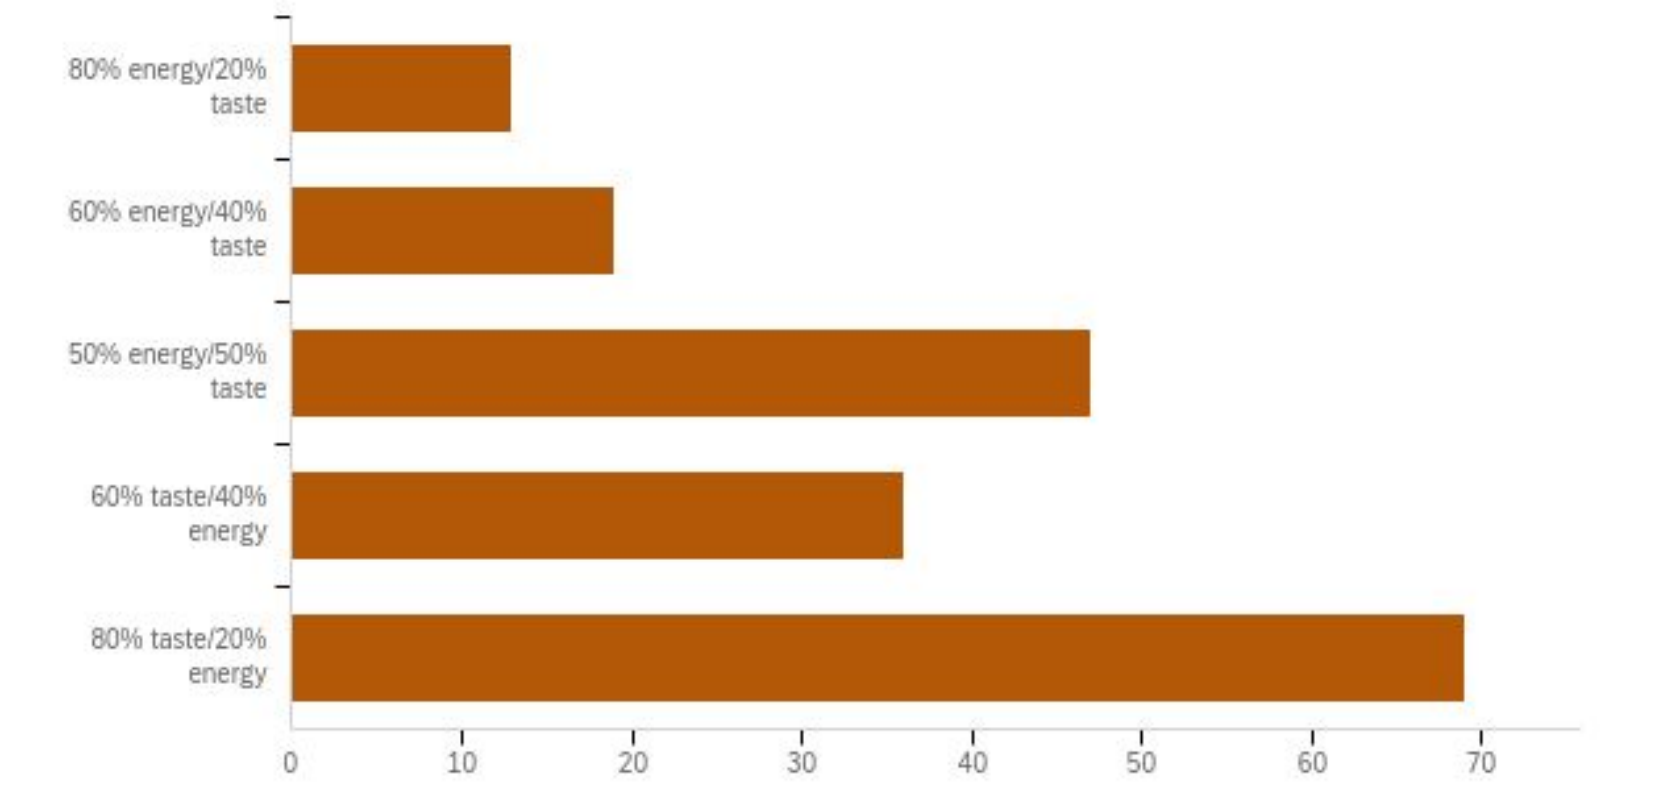

On a Given Week, How Often Do You Exercise?

- 25% exercise at least 3 times a week

N= 102

What Percentage of Importance Do You Place On Energy and Taste?

- 38% choose 80/20 when it comes to taste and energy.

N=102

Procedure: Data Collection

Survey through Qualtrics was used for data collection

- Recruitment
- Facebook
- GroupMe
- Snapchat
- Text

- Duration: 17.8 minutes
- Standard Deviation: 4.3 minutes
- Total Participants: 102

Results

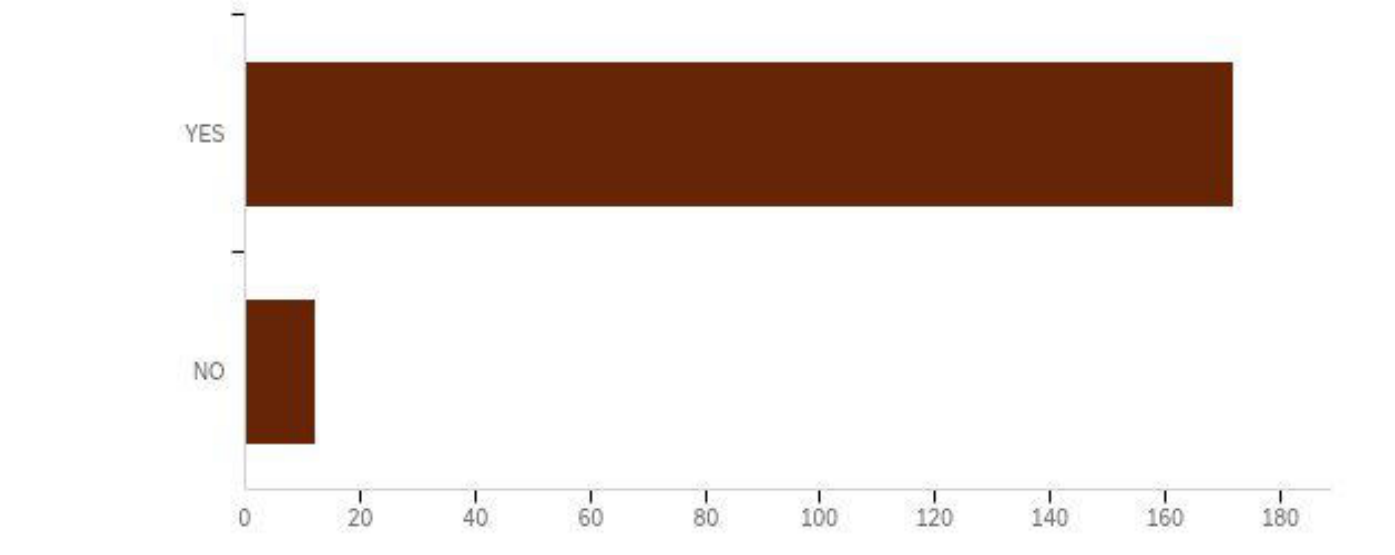

— Irene M. Pepperberg

Research Problem 1

Investigate what people consider a latte

Results: RP1 Investigate what people consider a latte

Do you know what a latte is?

- 93% of participants knew what a latte was compared to 7% of participants didn't know.

"When asked an open-ended question about what a latte is , 93% of our respondents in our sample (N=172) responded with yes

Results: RP1- Investigate what people consider a latte

What do you put in your latte?

- Majority of participants put milk , carmel , sugar or vanilla in their lattes.
- Some participants drink lattes the way it is- with no flavor additives.

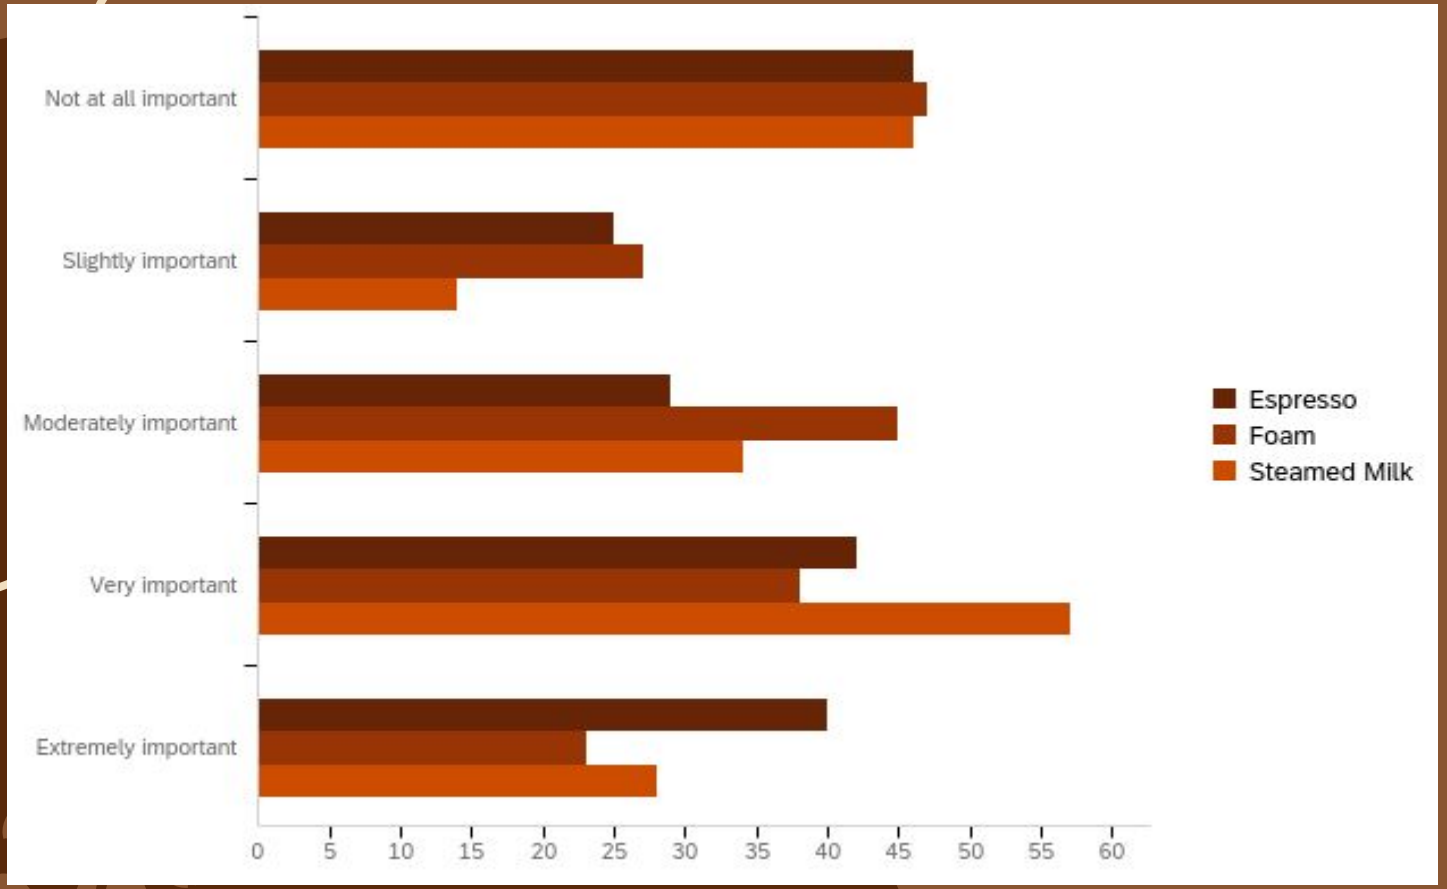

N=102

"The average answer of what they put in their latte among respondents was milk and carmel"

N=102

Results RP1- Investigate what people consider a latte

How important are each of these things in a latte for you?

- 31% of participants considered steamed milk **very important**.
- 25% of participants considered foam to be **moderately important.**
- 23% of participants considered espresso **very important.**

"A frequency analysis shows that 31% of participants consider steam milk very important (N=57)"

In the last four weeks , how many times have you asked for the following in your latte?

- Majority of participants asked for 0 or none of the following: Flavors , Extra Foam , No Foam, or Extra Shots.

N=102

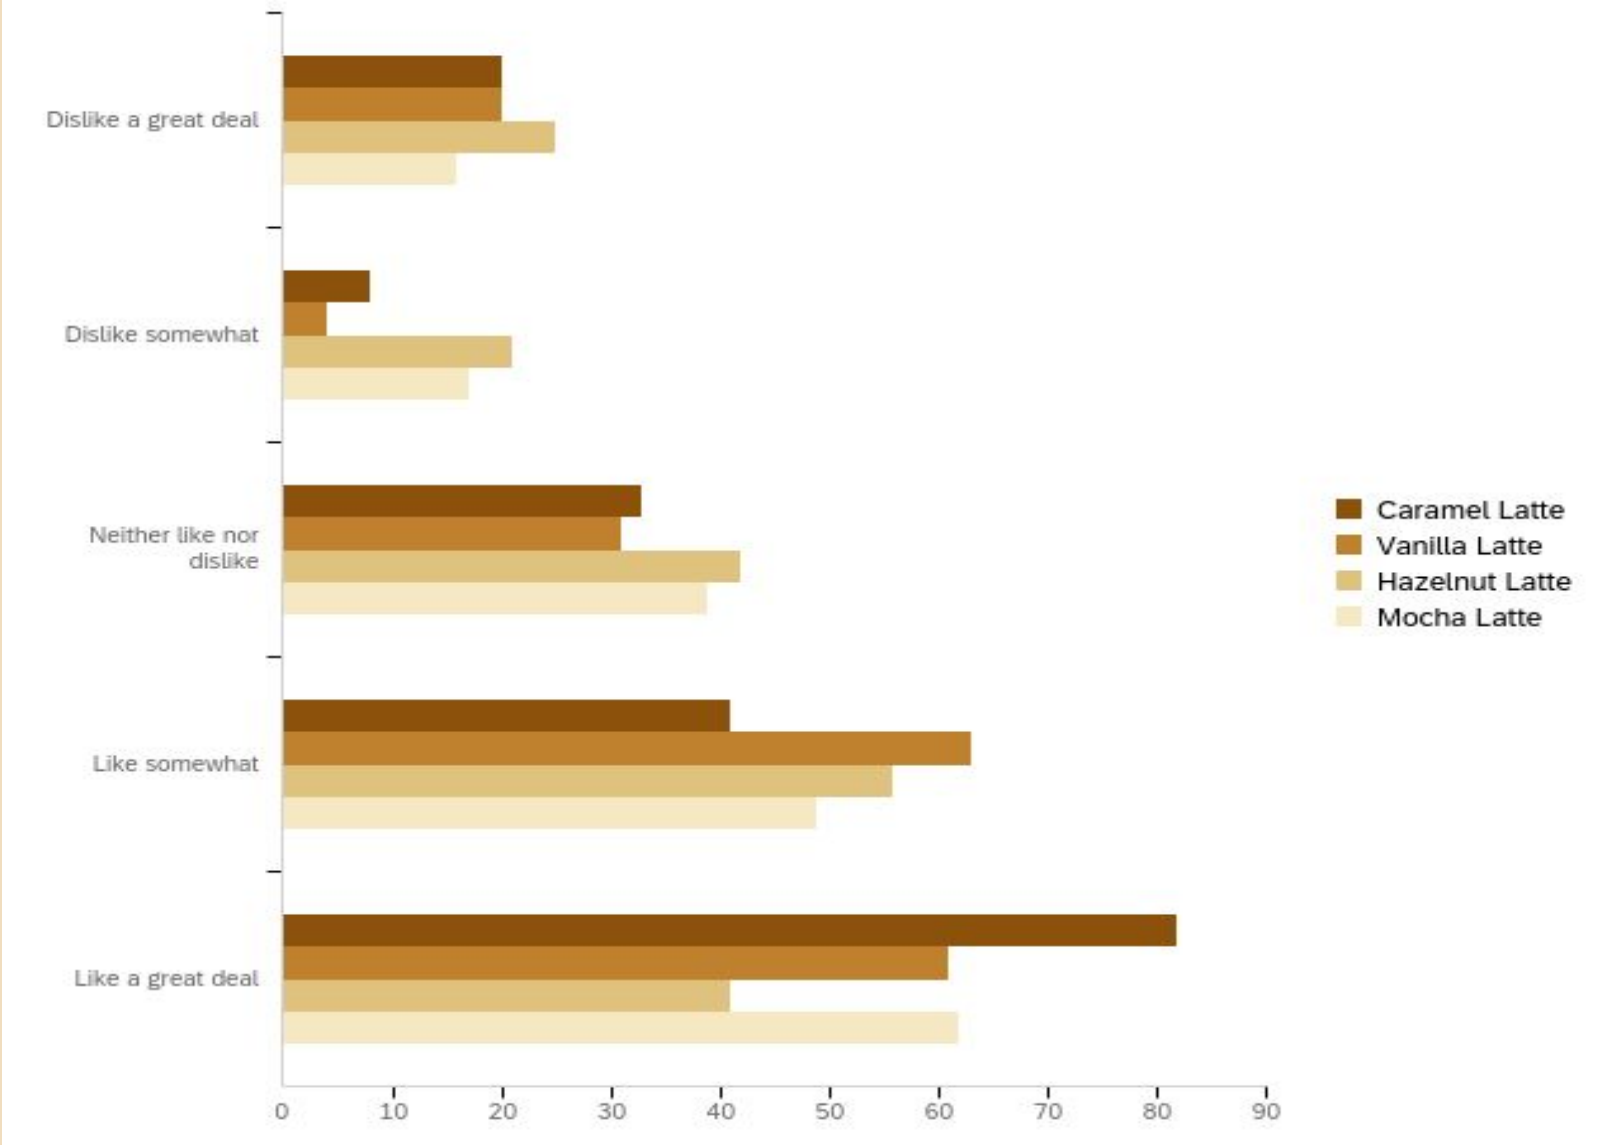

“The average answer how many times they asked for the following choice among respondents was 0”

N=102

Please indicate how much you like or dislike each of the lattes below

Results:RP1- Investigate what people consider a latte

- 45% of participants **like a great deal** of Carmel lattes.
- 34% of participants **like a great deal of** Mocha lattes.
- 34% of participants **like a great deal** of Vanilla lattes.

"A frequency analysis revealed that 45% of respondents (N=82) like a great deal of carmel lattes."

Summary and Insights

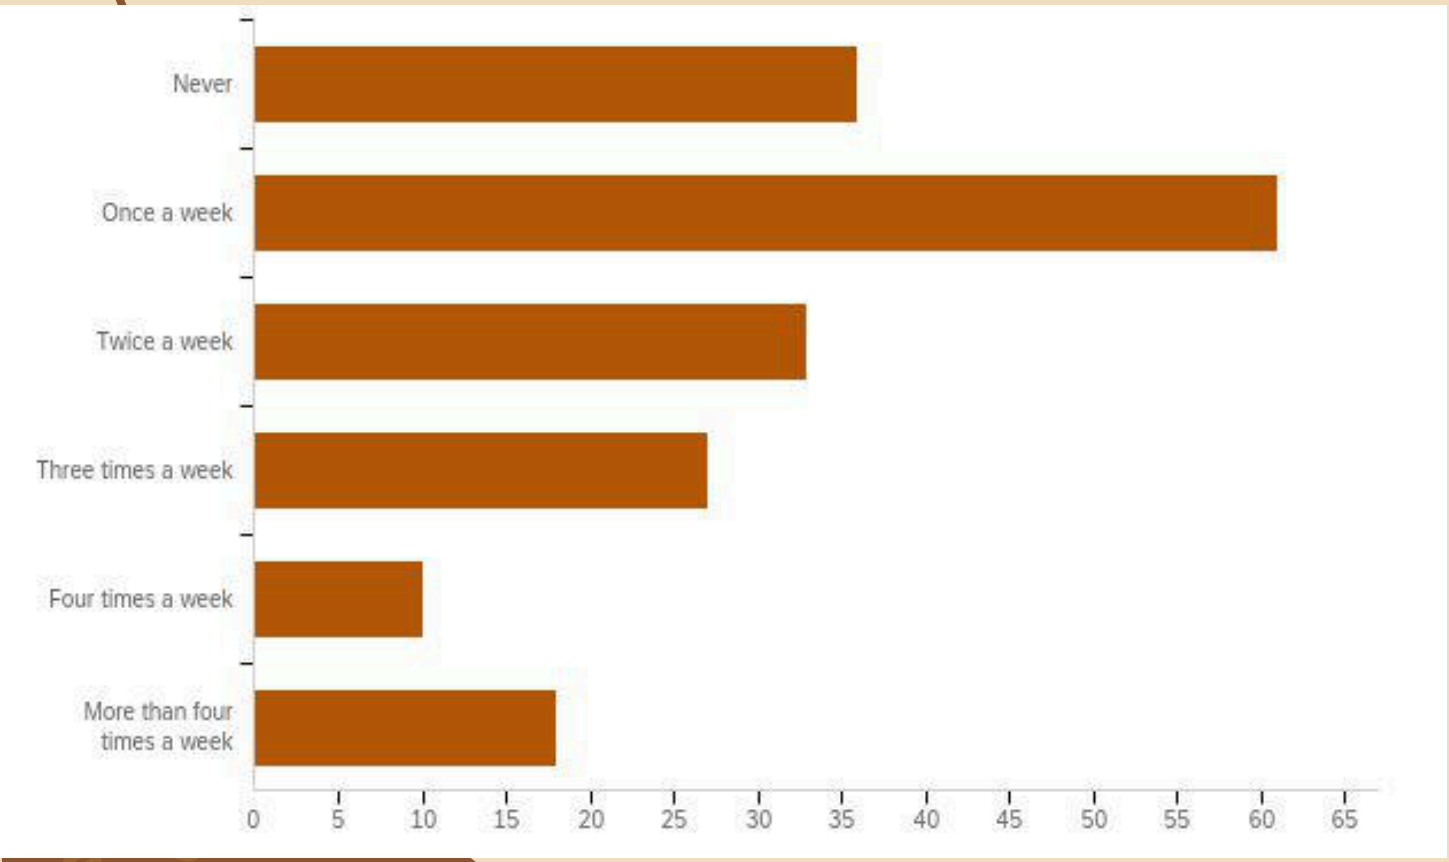

- Consumers are aware of what a Latte is, however many consumers have different ways they prepare theirs.
- Milk is very important when it comes to lattes
- Flavoring is also key for a latte as only a small portion of participants drink lattes without any added flavor
- Espresso in a latte is very important
- Slate should place emphasis on ingredients used
- Emphasis that even though the drink is lactose free, it still keeps the same flavor as chocolate milk
- Keep a variety of flavors to keep consumers interested
- Emphasis how the drink can provide energy on the label

Research Problem 2

Determine whether people prefer ready to drink or going to a coffee shop

Results: RP2: Determine whether people prefer ready to drink or going to a Coffee shop

How often do you visit your local coffee shop?

- 33% of participants visit their local coffee shop **once a week.**
- 20% of participants **never visit** their local coffee shops.
- 18% of participants visit their local coffee shop **twice a week.**

N=102

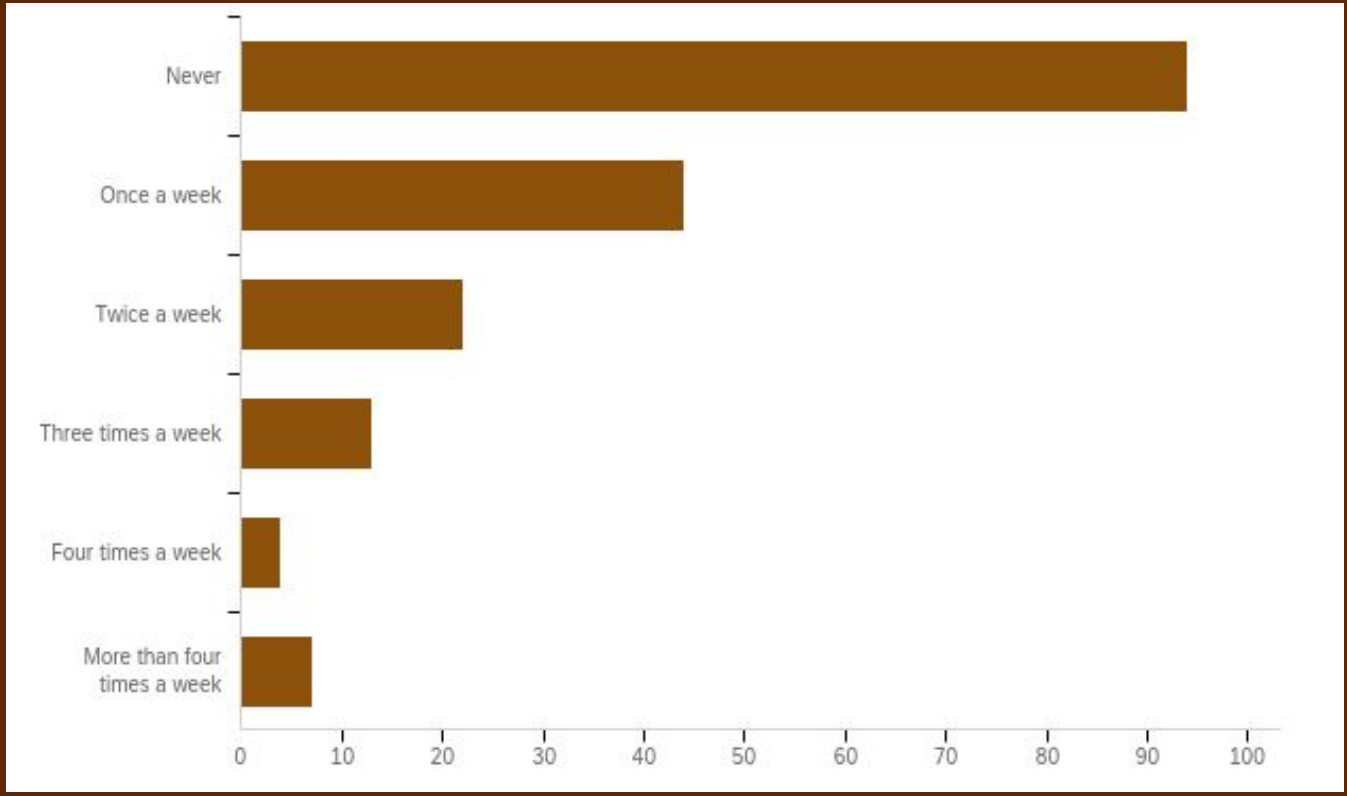

"A frequency analysis revealed that 33% of respondents (N=61) visit thor local coffee shop once a week"

Results: RP2- Determine whether people prefer ready to drink or going to a coffee shop

How often do you purchase ready to drink (RTD)?

- 51% of participants **never** purchase RTD beverages
- 24% of participants purchase RTD beverages **once a week.**
- 12% of participants purchase RTD beverages **twice a week.**

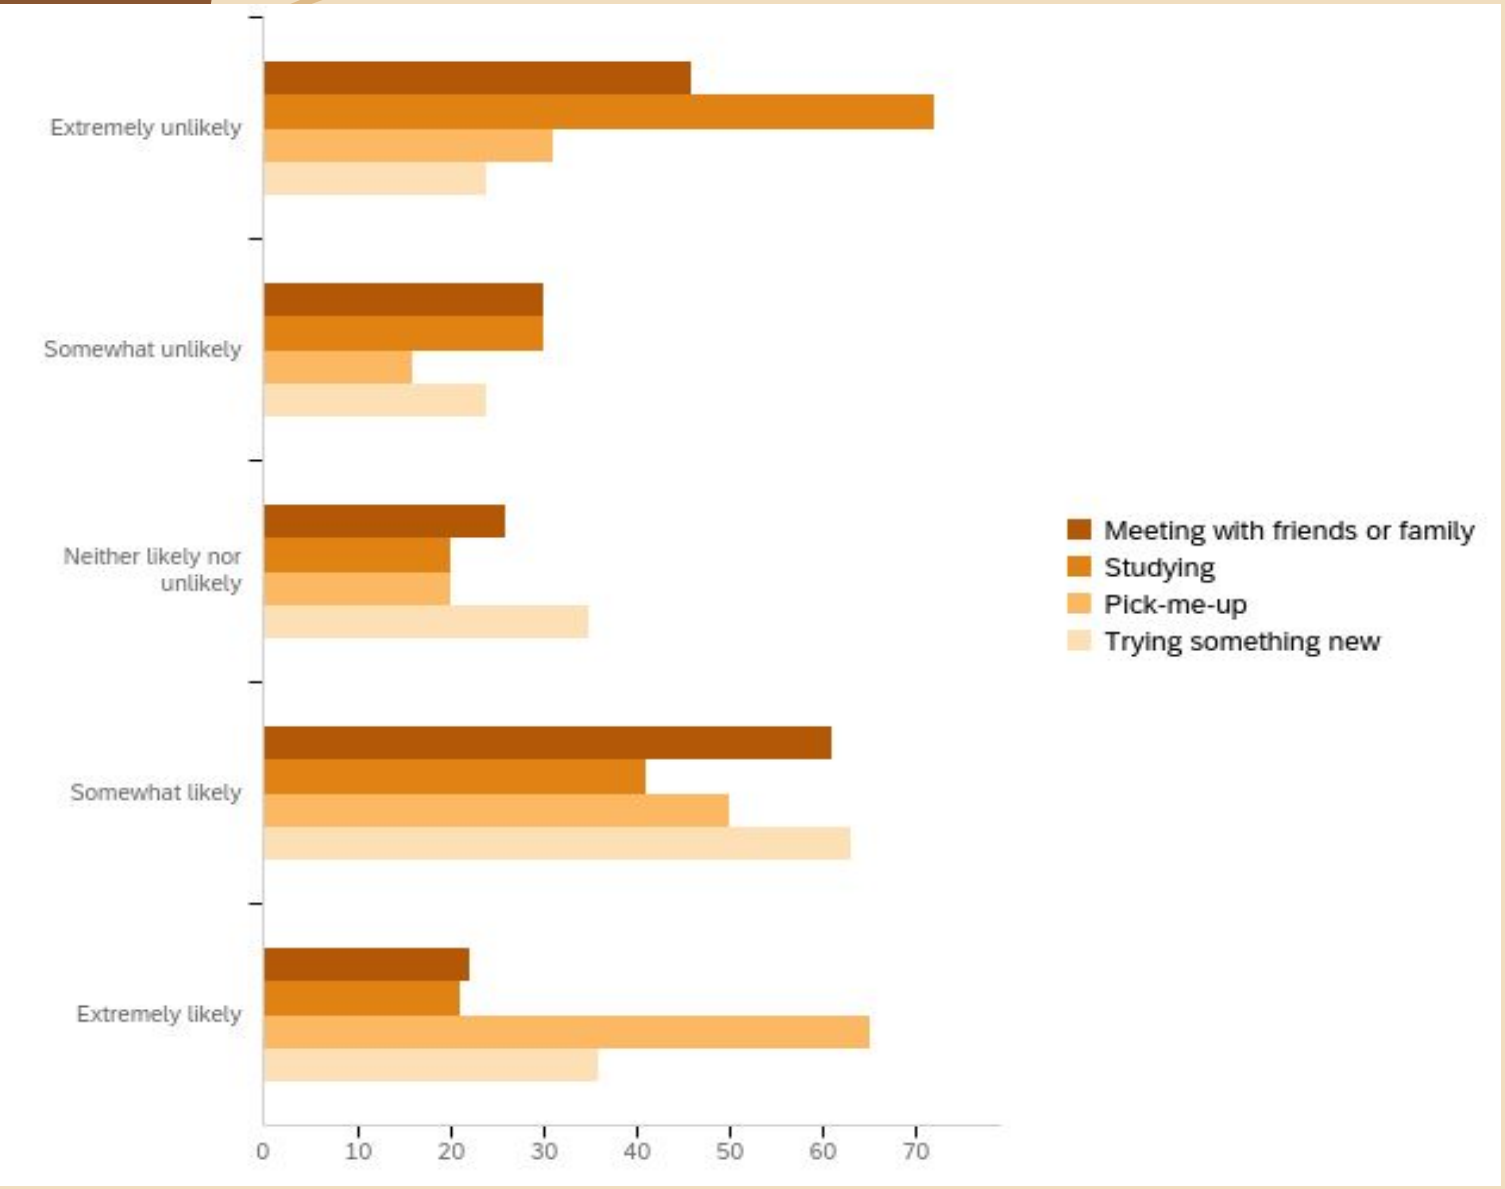

N=102

"A frequency analysis revealed that 51% of respondents (N=91) never purchase RTD."

N=102

Results RP2: Determine whether people prefer ready to drink or going to a coffee shop

How likely are you to go to coffee shops for the following reasons?

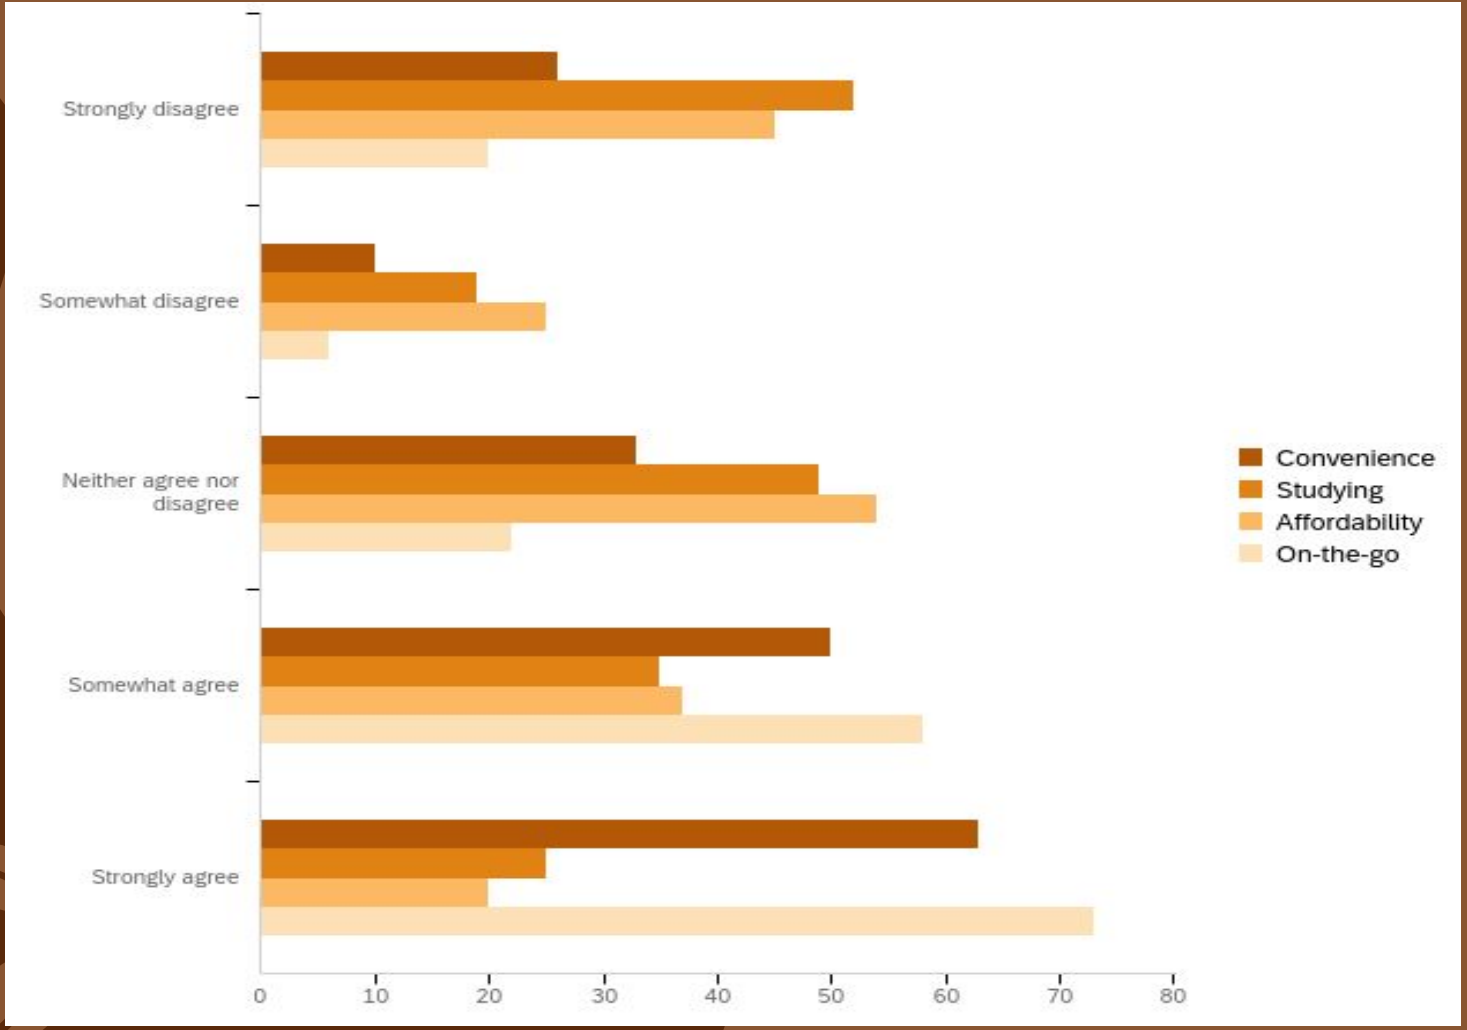

- 36% of participants **extremely likely** go to coffee shops for a “pick me up”.
- 35% of participants are **somewhat likely** go to coffee shops to try to something new
- 33% of participants are **somewhat likely** to go to a coffee shop to meet family and friends.

“A frequency analysis revealed that 36% of respondents (N=65) go to coffee shops for a pick me up”

N=102

Results RP2: Determine whether people prefer ready to drink or going to a coffee shop

Why do you purchase ready to drink (RTD)?

- 40% of participants **strongly agreed** they purchase RTD beverages for on the go.
- 35% of participants **strongly agreed** they purchase RTD beverages for convenience.

"A frequency analysis revealed that 40% of respondents (N=73) purchase RTD for on the go"

Summary and Insights

- People still visit coffee shops about 1 to 3 times a week on average
- Participants are more likely to buy regular coffee than ready to drink
- Reasons for buying ready to drink are a mixture of convenience and affordability

- Perhaps try to get product sold in coffee shops like how Dunkin sells ready to drink products in their stores
- Providing sales or free samples to boost ready to drink sales and create brand recognition
- Keep the product affordable to compete with coffee shops

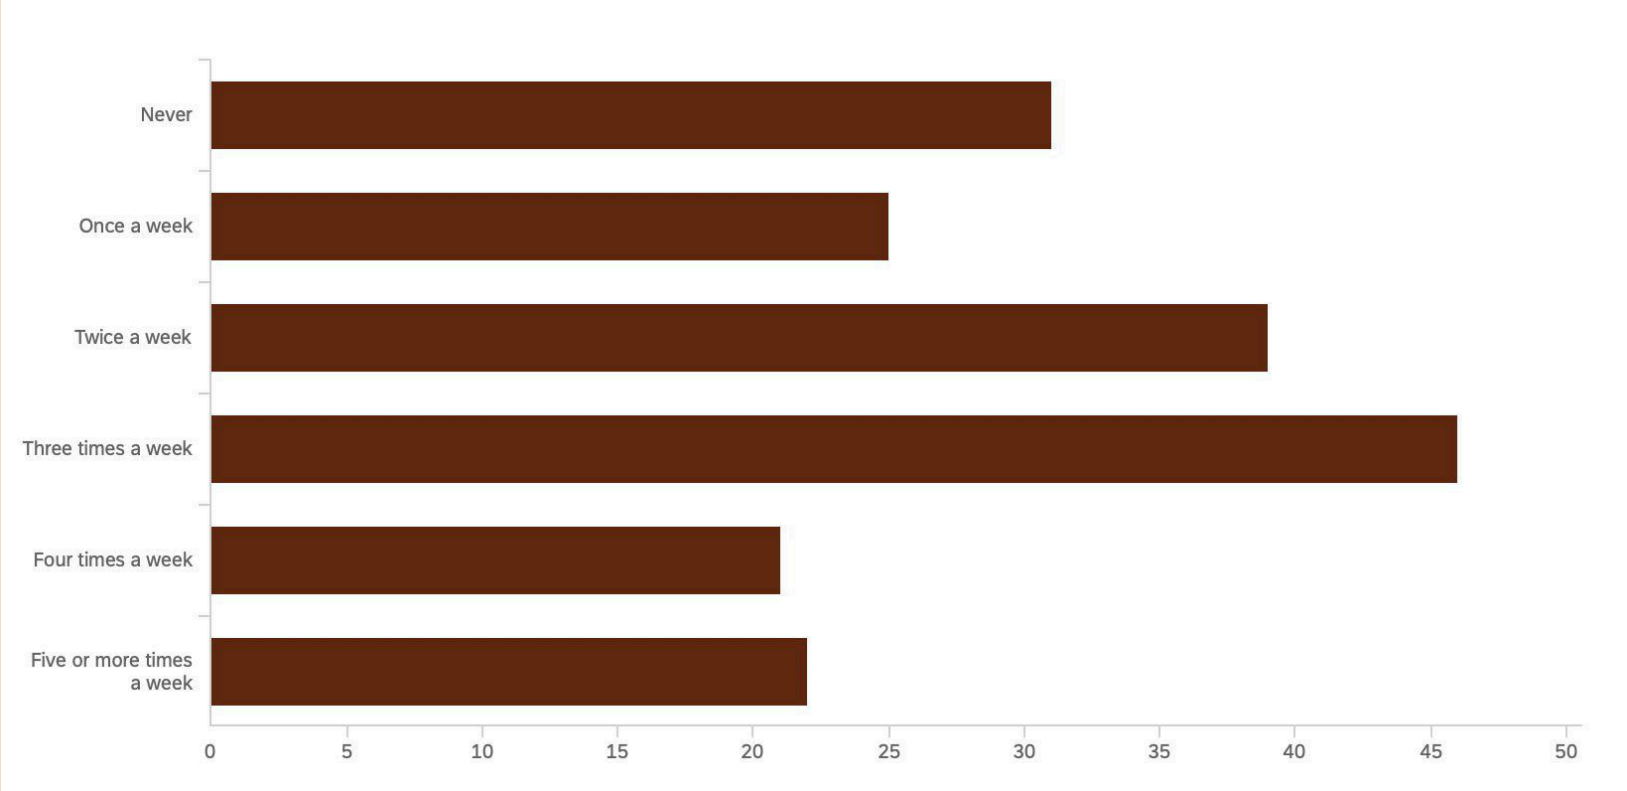

Research Problem 3

Determine whether energy or taste is more important when it comes to caffeinated beverages

Results: RP3: Determine whether energy or taste is more important when it comes to caffeinated beverages

N=102

On a given week , how many day do you exercise?

- 25% of participants exercise **3 times a week.**
- 21% of participants exercise **2 times a week.**
- 17% of participants **never exercise.**

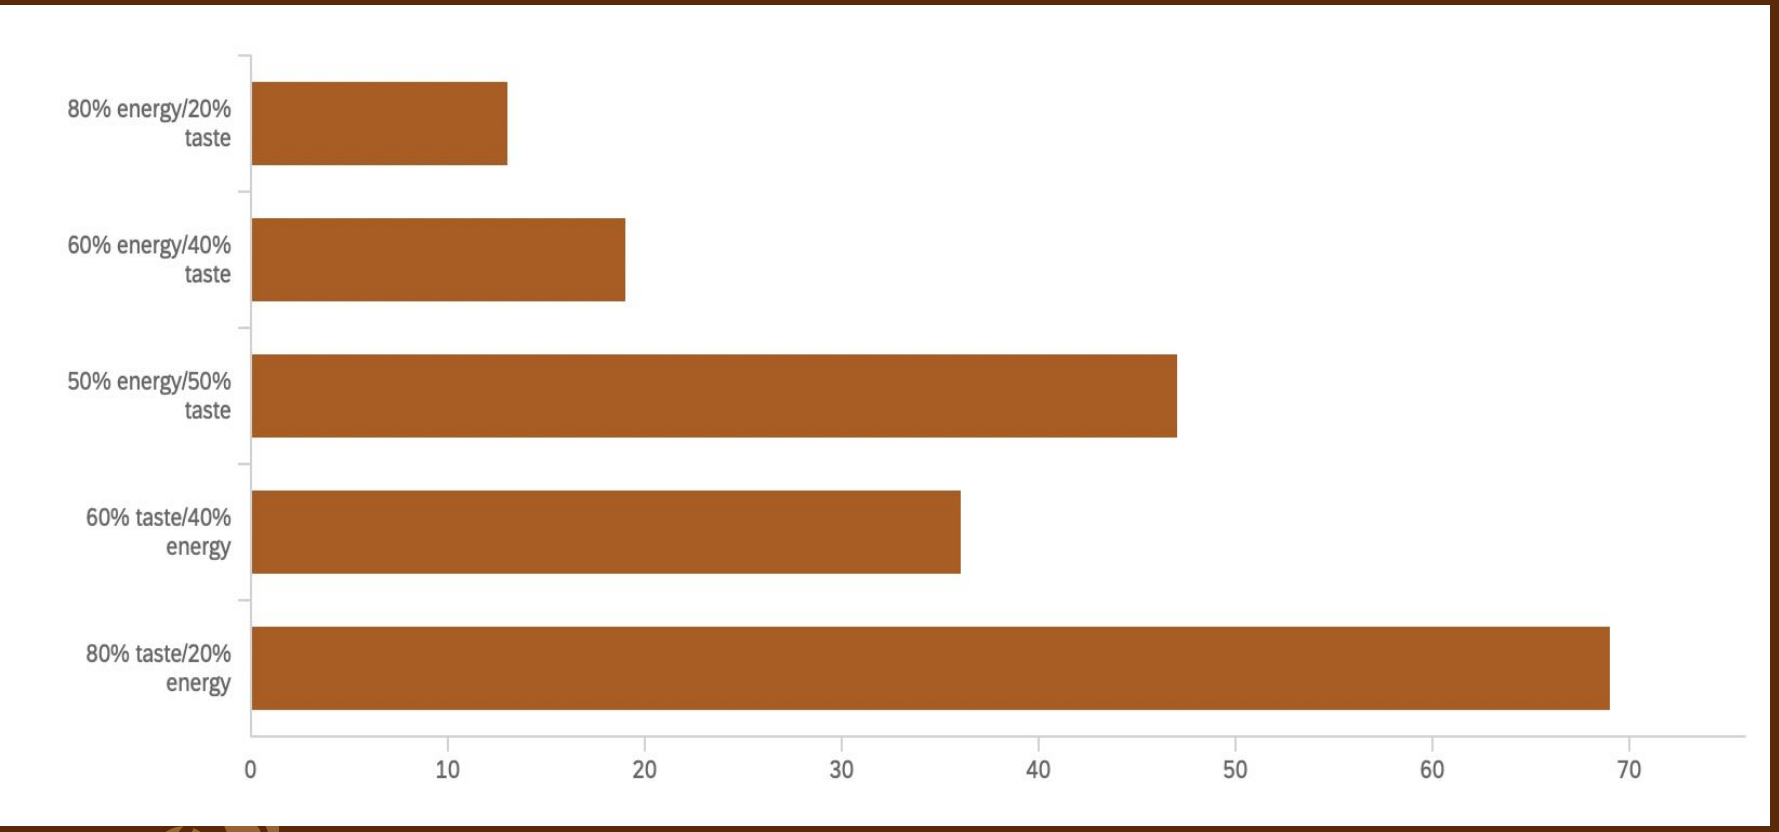

"A frequency analysis revealed 25% of respondents (N=46) exercise 3 times a week. "

Results: RP3- Determine whether energy or taste is more important when it comes to caffeinated drinks

What percentage of importance do you place on energy vs. taste on caffeinated beverages?

- 38% of participants choose **80% taste and 20% energy.**
- 26% of participants choose **50% energy and 50% taste.**
- 20% of participants choose **60% taste and 40% energy.**

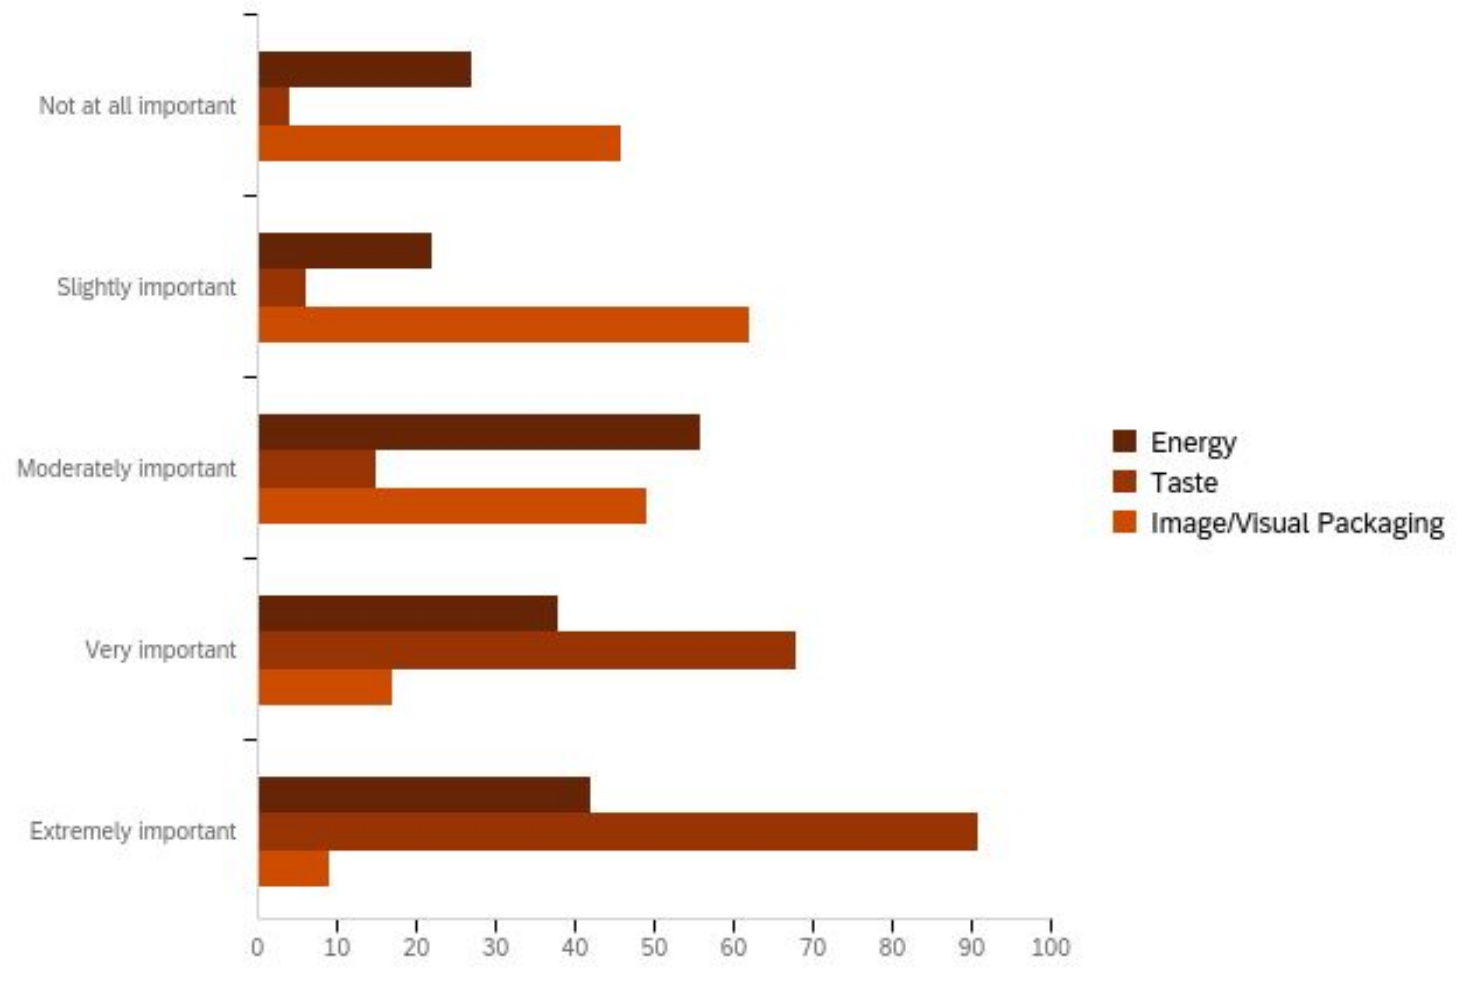

N=102

"A frequency analysis revealed 26% of respondents (N=69) choose 80% taste and 20% energy."

N=102

Results RP3: Determine whether energy or taste is more important when it comes to caffeinated beverages?

How important are each of these things in caffeinated beverages?

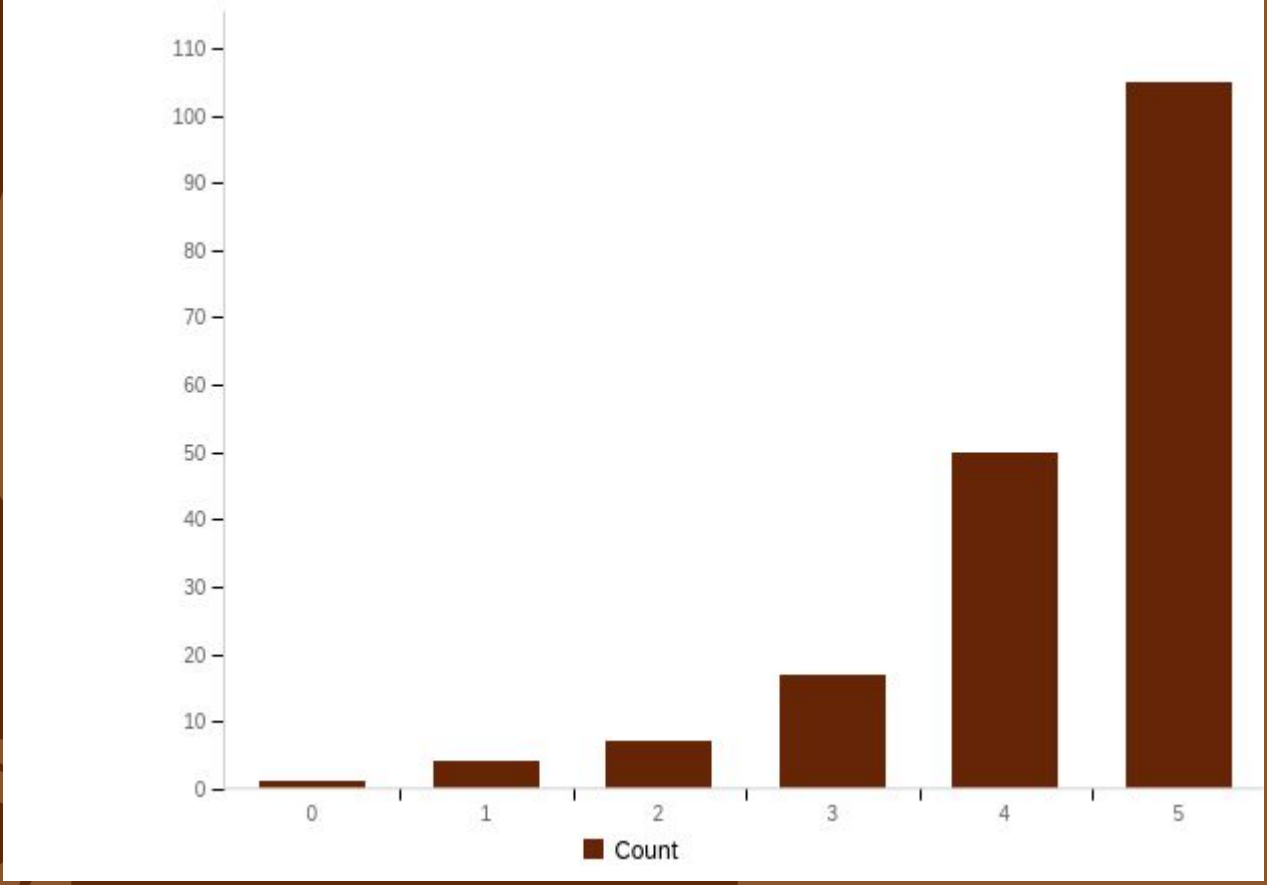

- 50% of participants said taste is **extremely important.**
- 30% of participants said energy is **moderately important.**

"A frequency analysis revealed 50% of respondents (N=91) taste is extremely important"

N=102

Results RP3: Determine whether energy or taste is more important when it comes to caffeinated drinks?

On a scale of 1-5 how important is taste when it comes to a caffeinated drink , with 1 being least important and 5 being most important?

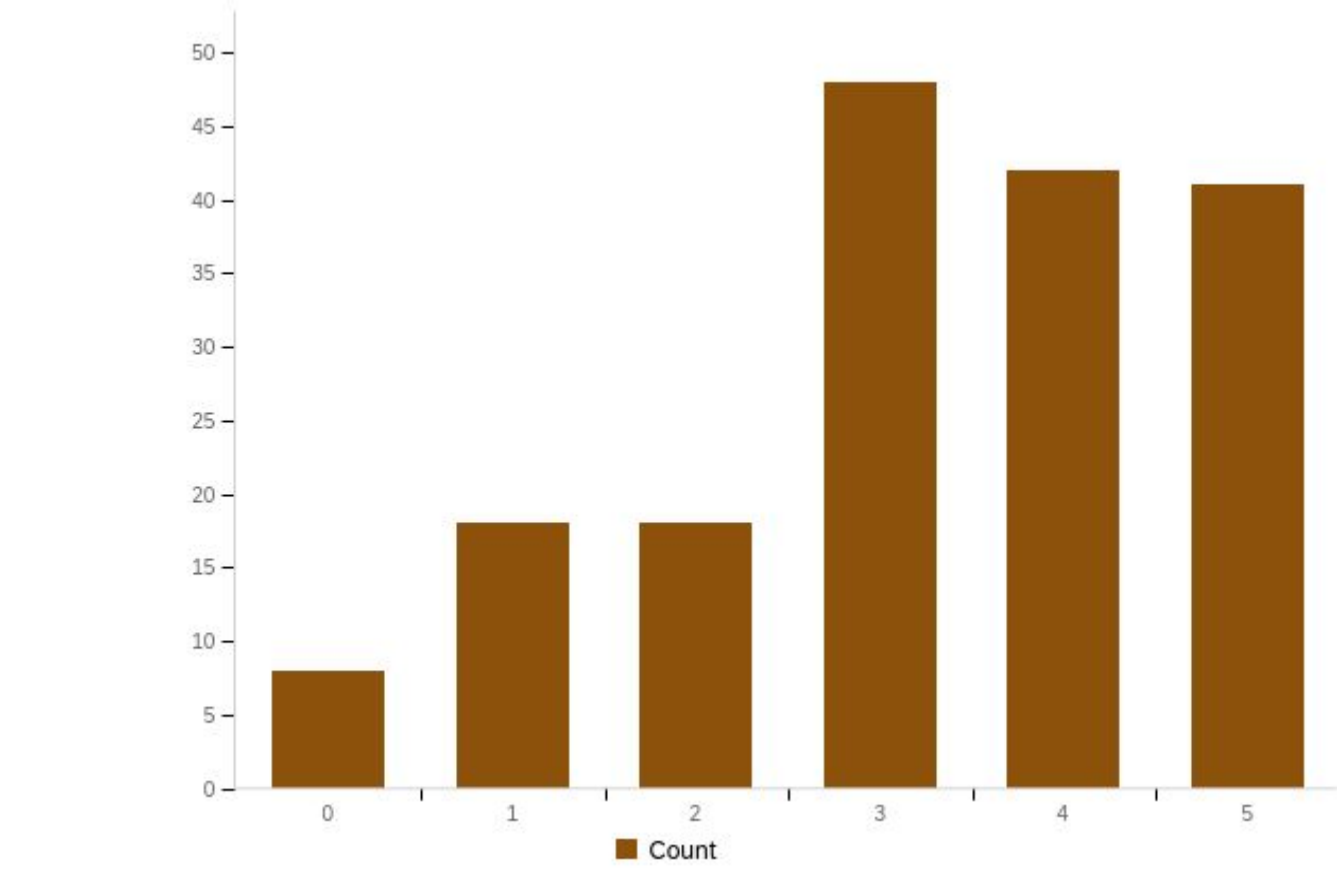

- 105 participants said taste was the most important (5) when it comes to a caffeinated drink.

"The average answer among respondents taste is most important when it comes to caffeinated drinks (N=105)"

Results: RP3: Determine whether taste or energy is more important when it comes to caffeinated drinks

On a scale of 1-5 , how important is the energy when it come to a caffeinated drink, with 1 being least important and 5 being most important?

- 48 participants picked **3** on how important energy is when it comes to caffeinated drinks.

"The average answer among respondents was 3 choosing importance of energy (N=48)"

N=102

Summary and Insights

- Taste is hold to a higher standard than energy
- Visual packaging also help grab the consumer's attention
- Energy provided stills has a place in caffeinated drinks
- Testimonials and constant reminder about taste will help establish Slate's reputation on flavoring
- Packaging is important to distinguish Slate from other popular brands
- Place more emphasis on taste rather than energy when marketing product
